

## Applications and Use Cases!

*FrontFace for Touch Kiosks* is a universal kiosk software with many, powerful features. This is an overview of typical use cases and applications where *FrontFace* is a perfect choice:

- **Hotel / Catering:** Self-service information terminals and public surf stations for hotel guests (e.g. in the lobby) as well as interactive menu boards in restaurants, snack bars and cafeterias
- **Public Administration:** Information and guide terminals as well as self-service kiosks for citizens and customers, e.g. in town halls, citizen centers, courts, public authorities and employment bureaus
- **Museums, Culture, Tourist Information & Education:** Kiosks and terminals for guests, visitors and tourists with information about tourist sites, exhibits, local offers and further descriptions
- **Real Estate Business:** Interactive real estate exposés for customers of banks and real estate agencies as well as for interactive, digital shop window advertising that can also be used after business hours
- **Retail:** Terminals and tablets for informing customers, for digital product catalogs, interactive in-store/POS advertising, coupon printing terminals and systems for customer surveys
- **Schools and Educational Institutions:** Interactive access to room occupancy plans and schedules of classes, meetings, conferences and congresses in schools, universities, libraries and educational centers
- **Enterprise Customers:** Welcome boards for visitors, information terminals or interactive, digital black boards for employees and self-service information kiosks for customers and prospects on trade fairs and exhibitions

## License Model and Pricing

### FrontFace for Touch Kiosks

License for a single kiosk / terminal PC

The license fee is a one-time fee; there are no recurrent costs (no subscription)!

**only 499.95 EUR**

## Hardware & Installation

Apart from the perfect interactive kiosk software solution we also offer full service packages including hardware (special display types, mini PCs, networking equipment, etc.) and installation services in cooperation with our certified hardware and service partners. Please contact us to find out if our extended service is also available in your country. Finally, we offer product training courses and extended consulting services on demand.

## Updates & Support

All updates within a year after purchase as well as technical support are free of charge! The pricing for a renewal of the free updates and support period is available on request. Additionally we also offer optional consulting, customization and software development services on demand.

## System Requirements

### Client PC (e.g. kiosk terminal, tablet, all-in-one PC):

- Windows XP, Windows Vista or Windows 7 / 8 (also Embedded versions) [32 bit or 64 bit]
- Touchscreen (multi touch or single touch)
- Alternatively: Mouse/Keyboard
- .NET Framework 4.0

### Optional, but not necessarily required:

- Shared network folder (for multi-user usage)
- Cloud storage service (e.g. Dropbox or SkyDrive)

Product Information

## FrontFace for Touch Kiosks

*FrontFace for Touch Kiosks* is the fast, affordable and easy-to-use solution for creating touch-enabled graphical user interfaces for kiosk systems and interactive information terminals which can be used to present any kind of media or content. This includes pictures, videos, documents, Web pages as well as Apps!

Simply define the navigation structure for your content and customize the visual appearance of the user interface according to your needs and requirements. The protected kiosk mode of *FrontFace for Touch Kiosks* allows you to turn any normal Windows PC (XP, Vista, 7 or 8) into a secured, public kiosk terminal with a single mouse click!

### Easy to Use & Highly Intuitive:

Create your own kiosk system in less than five minutes. Creating content is as easy as copying files & folders!

### Reusability:

Easily reuse your existing hardware, software and content (e.g. PowerPoint, PDF documents, CMS, Intranet, etc.)

### Very Flexible:

Remotely update your content on the fly via LAN/WiFi, Internet/Cloud or USB flash drive! - Simply Plug & Play!

## Print2Screen: Create Content Easily!

The unique **Print2Screen** feature of *FrontFace for Touch Kiosks* allows you to create high-quality content with any Windows application that supports printing (e.g. Word, PowerPoint, Excel, PDF Reader, etc.). Simply use your existing content and "print" it in order to import the content into your touch screen menu without any further steps or modifications!

## The Touch Kiosk Configurator:

The entire content management of *FrontFace for Touch Kiosks* is file system-based which means that you can easily update your content on the fly in a local network over a simple network share. And in case your kiosk terminal is only accessible over the Internet, you can use common cloud storage services such as SkyDrive or Dropbox to keep your terminals up-to-date - worldwide!

An offline update mechanism that uses an USB thumb drive is supported as well (with instant plug & play).

## Supported Media Formats:

**A free demo version as well as further information is available at:**
